

Telco Customer Churn Analysis Report

Prepared by Tan Yan Bin

Customer Churn

Churn is a phenomenon when customers **stop using a product** from a specific company.

Main Objective:

To **increase the retention period** of existing customers

Specific Objective:

To **predict which customers are more likely to churn.**

Churn vs Existing Customer Distribution

Data Exploration

Data Exploration

Data Exploration

Major Insights

Higher churn rate is observed within

- senior citizens
- customers who have *no* partner or *no* dependents
- customers who opt for paperless billing and electronic check
- customers with shorter contract term
- customers with less additional services

Most churned customers have

- shorter tenure
- shorter total charge (may due to short tenure)
- higher monthly charge

Predictive Modelling

Decision Tree Model

Prediction Power:

F1-score = 0.7304

Recommendations

- Continue to collect more data
- Look for other features that can be included, such as data usage volume, call durations, satisfaction survey, and etc.
